no. 10, p. 1177-1188.

Present knowledge in the field of complex hydrides is reviewed and classified. The chemical properties of LiAlH_4 in the organic domain are classified in several groups according to the type of organic function treated. A comparison of the reactivities of the most important complex hydrides, and of some of their most recent derivatives is attempted.

DESCRIPTORS: *Electrophotography, Electrostatics,
Sensitivity.

The electrolytic and electrostatic methods of electrophotography are described. A brief historic review precedes a discussion of the mechanism and the commercial applications of the two systems. (Author)
